Cold-water prawns are a true delicacy, with their bright-pink colour and firm, juicy texture. From their origin in the ice-cold and clear waters of the North Atlantic and Arctic Oceans, the cold-water prawns grow slowly until reaching full size at 6 years. Due to the slow growth flavours and texture are given time to fully develop. The sweet and savoury flavours combined with a juicy bite offer a full flavour experience. The prawns are high in protein and low in fat, making them a healthy choice.

Cold-water prawns in brine are a ready-to-eat and easy-to-portion product that can be stored in the refrigerator.

INGREDIENTS

Prawns (**crustaceans**), water, acidity regulators (E325, E262, vinegar, E270, E330), salt

SERVING

The cold-water prawns are uniform in size with a consistent quality. Their fresh taste is ideally complimented by mild, fatty or acidic flavours. The prawns lend themselves well to cold dishes including salads, sandwiches and appetizers or as toppings.
