These wild caught cold-water shrimp are a true delicacy, with their bright-pink color and firm, juicy texture. From their origin in the ice-cold and clear waters surrounding Greenland, the cold-water shrimp grow slowly until reaching full size at 6 years. Due to the slow growth flavors and texture are given time to fully develop. The sweet and savoury flavors combined with a juicy bite offer a full flavor experience. The shrimp are high in protein and low in fat, making them a healthy choice.

Shell-on cold-water shrimp are cooked and frozen at sea within 3 hours from catch. The fast processing locks in the natural flavor and the crisp, moist texture. Gentle thawing in the refrigerator best preserves the ultimate freshness of the shrimp.

### INGREDIENTS

Shrimp (**crustaceans**) (*Pandalus borealis*), salt, water (protective glaze). May contain traces of fish.

### SERVING

The cold-water shrimp are uniform in size with a consistent quality. Their fresh taste is ideally complimented by mild, fatty or acidic flavors. The shrimp lend themselves well to cold dishes including salads, sandwiches and appetizers or as toppings.

### COOKING INSTRUCTIONS

Peel and eat after defrosting in refrigerator.
