Cold-water shrimp are a true delicacy, with their bright-pink color and firm, juicy texture. From their origin in the ice-cold and clear waters of the North Atlantic and Arctic Oceans, the cold-water shrimp grow slowly until reaching full size at 6 years. Due to the slow growth flavors and texture are given time to fully develop. The sweet and savory flavors combined with a juicy bite offer a full flavor experience. The shrimp are high in protein and low in fat, making them a healthy choice.

The single frozen cold-water shrimp are wild caught close to our processing facilities, where they are peeled and cooked in a continuous process to preserve the delicate taste and texture. They are individually quick-frozen to make portioning easy directly from the freezer. Gentle thawing in the refrigerator preserves the natural flavors best.

### INGREDIENTS

Shrimp (**crustaceans**), salt. Water (protective glaze)

### SERVING

The cold-water shrimp are uniform in size with a consistent quality. Their fresh taste is ideally complimented by mild, fatty or acidic flavors. The shrimp lend themselves well to cold dishes including salads, sandwiches and appetizers or as toppings.
