Greenland halibut has a sweet and buttery umami flavour and a soft, pleasant texture. The meat is very white and the flavour fully developed, due to the slow growth in the ice-cold waters of the North Atlantic and Arctic Oceans. Greenland halibut has a high natural content of the healthy omega-3 fatty acids (2.36 g/100 g) and potassium.

Greenland halibut adapts smoky flavours well and can advantageously be used in cold dishes such as salads, appetizers and on buffets. Cold smoked Greenland halibut obtains a firm texture and a significant smoky flavour. It forms a good alternative to traditional cold smoked salmon.

### INGREDIENTS

Greenland halibut fillets (**fish**), salt, acidity regulators (E325, E262, E270). Smoked.

### SERVING

The smoked fillet benefits from acidic flavours and crunchy textures that complement the rich, smoky and soft meat.
