PACKAGING CONCEPT WITH ZIPPER

helps **reduce** food waste

Delicious fish in re-sealable bags

Royal Greenland offers a range of **high quality seafood** in illustrated re-sealable zip-lock bags, which **allows the kitchen to take out the needed amount of Seafood**, re-seal the bag and put **the rest back in the freezer**.

The remaining fish in the sealed bag are thus protected from the harsh, dry environment in the freezer and **stay fresh** until fish are on the menu again. This means **easy handling for the kitchen** and **reduces waste**.

The range includes **carefully selected species** and **the bags are clearly colour coded** according to specie, making it **easy and quick for the user to choose** the right one for their purpose. In addition, **the range presents itself well in the Cash & Carry freezer**.
