PRODUCTION UNITS OUTSIDE GREENLAND

In Denmark, the factory in Aalborg primarily operates in two areas: final packaging of prawns for European retail and foodservice customers, and production of prawns in brine. The two German factories in Cuxhaven are jointly administered and focus on packaging the zip-lock and chain pack assortments, and retail packaging of lumpfish roe. The factory in Koszalin fillets plaice, flounder and Greenland halibut, and is responsible for extensive final processing and packaging for the European markets. The prawn plant in Matane purchases and processes prawn, mainly from the local fishing grounds.
